Description

-new-

Vacuum suction conveyor with automatic filter cleaning. The conveyor is completely made of stainless steel. The discharge flap is equipped with a lip seal. The two-stage blower guarantees a long service life of the unit. The SMD-based control is installed under a protective stainless steel cover and monitors all processes. Errors are indicated by means of the clearly visible alarm light. A proportional valve can be connected directly for the admixture of regrind.

* All prices excl. VAT plus shipping costs and possible delivery charges, if not stated otherwise.

With the optionally available Master K remote control, all parameters can be set quickly and easily.
